Existential Psychotherapy
The Challenge of Being in Individual and Group Psychotherapy

September 28th 2007
Copenhagen - Denmark

Welcome Speech to Ernesto Spinelli

Our first presenter - author of numerous books and articles – recipient of the British Psychological Society's Award for Outstanding Contributions to the Profession - and awarded a Personal Chair as Professor of Psychotherapy and Counselling – at Regents College, London - Ernesto Spinelli PhD!

Dr. Spinelli! We are very pleased and honoured to be able to welcome you for the 2nd time in our society.

You have an international reputation for your eminent contributions to existential psychotherapy and phenomenological psychology - transforming existential philosophy into theory and guidelines for practice.

You suggest the psychotherapist - radically - to be a living expression - of his or her theoretical approach - and point out risks in striving towards effectivity by focusing on techniques of healing – and so, you challenge, inspire and enlighten mainstream psychotherapy approaches - in today's health care systems.

We are looking forward to the next 3 hours with you!

Klaus Pedersen
Chairman - DPSP
